EXPERIENCE

UX Designer at ZILO (London)

2024 - 2026

I was the sole designer on ZILO Migrate, an AI data migration tool. I took complex workflows and created a well-designed, easy-to-use experience for users.

I led UX on ZILO Invest, a digital investment portal for customers and professionals, on various journeys from concept through to shipped UI on desktop and mobile.

I was the lead for user testing at ZILO. I ran and managed the sessions and collated the findings into new iterations of the designs.

UX Designer at Zurich Insurance Company Ltd (Australia)

2021 - 2023

First in-house UX designer hired by Zurich Australia. UX research and interface design on regulated insurance products, including Zurich's client-facing digital estate. I mentored junior designers through critique and delivery support.

I designed and shipped customer-facing native mobile apps for Australian financial services partners, including the Hostplus super member dashboard, Medibank Member App cover and pricing, and Up Bank saver protection.

I facilitated a five-day design sprint for Digital HQ. The project was funded and became the Teams landing page for every Zurich employee in Australia.

UX/UI Designer, Freelance

2020 - 2021

Independent UX/UI projects from discovery through delivery for AtOnce (education services marketplace), Collabor8, and Recycle Assist (mobile recycling guidance app).

Wireframes, prototypes, and UI across web and mobile, from brief through handoff for each client.

SKILLS

Prototyping

Interaction design

Information architecture

User journeys

Usability testing

UX research

Workshops

Design systems

Figma

Handoff to engineering

Customer Mastery
Programme, Zurich Insurance
, August 2022 (UX & usability
testing)

100 Design Projects short
course, University of the Arts
London, February 2025

ABOUT

I'm a product designer based in London. I design everything around users, and have done so across various industries including fintech, insurance, health, education and ecommerce.

I design in Figma and create prototypes with various tools including Claude. I am always interfacing with users and validating my decisions. Please visit my portfolio at jackalexmorgan.github.io or reach out to me to learn more.
